Filing Date: September 28, 2006

Title: COMMERICAL PRODUCT SALES SYSTEM, COMMERICAL PRODUCT SALES-USE PRINT FOR SAME AND PRINTING METHOD FOR THE PRINT

said code for indicating said commercial product information is either a bar code or a two-dimensional code

 (Previously Presented) The printing method for a commercial product sales-use print according to claim 1, wherein

said commercial product information is the one including either or the entirety of the URL (uniform resource locator), advertisement name, advertisement date, or product code of the sales entity of said commercial product.

- 6. (Original) A commercial product sales-use print, printing comprising: at least a visible image of a commercial product; and a commercial product information, which relates to the commercial product of the visible image, made up of a latent optical image that is almost invisible under visible light and becomes a visible image in a photograph of the print, per image section of the print according to a category of the commercial product.
- 7. (Original) The commercial product sales-use print according to claim 6, wherein said commercial product information by said latent optical image includes either or the entirety of the URL (uniform resource locator), advertisement name, advertisement date, or product code of the sales entity of said commercial product.
- (Previously Presented) The commercial product sales-use print according to claim 6, wherein

said latent optical image is printed by overlapping with a visible image of said commercial product.

 (Previously Presented) The commercial product sales-use print according to claim 6, wherein

said latent optical image is printed by overlapping with a visible printing of a price display which is printed together with said commercial product.

Filing Date: September 28, 2006

Title: COMMERICAL PRODUCT SALES SYSTEM, COMMERICAL PRODUCT SALES-USE PRINT FOR SAME AND PRINTING METHOD FOR THE PRINT

(Previously Presented) The commercial product sales-use print according to claim 6, 10. wherein

said latent optical image is printed in an unprinted part within one image section.

- (Original) The commercial product sales-use print according to claim 10, wherein 11. said unprinted part is the one adjacent to a visible printing of a size display which is printed with said commercial product.
- (Original) A commercial product sales-use print, printing comprising: 12. at least a visible image of a commercial product; and a code for indicating commercial product information relating to the commercial product of the visible image by being embedded so as to be mixed with the pixels of the visible image of the commercial product, per image section, the number of which is according to that of categories of commercial products.
- (Original) The commercial product sales-use print according to claim 12, wherein 13 said code indicating said commercial product information is a bar code or a twodimensional code.
- 14 (Previously Presented) The commercial product sales-use print according to claim 12, wherein

said commercial product information is the one including either or the entirety of the URL (uniform resource locator), advertisement name, advertisement date, or product code of the sales entity of said commercial product.

(Previously Presented) A commercial product sales system, comprising the procedures 15 of.

photographing said image section which prints said desired commercial product that is contained by said commercial product-use prints according to claim 6;

Title: COMMERICAL PRODUCT SALES SYSTEM, COMMERICAL PRODUCT SALES-USE PRINT FOR SAME AND PRINTING METHOD FOR THE PRINT

placing an order of the photographed commercial product by converting the photographed image data into an electric signal and transmitting it by way of a predetermined telecommunication network; and

establishing the order by transmitting a response to image information of a prescribed format which is transmitted corresponding to the order of the commercial product by way of the telecommunication network.

- (Original) The commercial product sales system according to claim 15, wherein 16 said response to image information of said prescribed format includes at least the name, street address and telephone number of a party sending the response.
- (Previously Presented) The commercial product sales system according to claim 15, 17 wherein

said photographing of said image section is carried out by a cellular phone equipped with a camera, a personal digital assistance (PDA) equipped with a camera and telecommunication function, or a digital camera; and

said transmission is carried out by a cellular phone equipped with a camera, a personal digital assistance (PDA) equipped with a camera, or a personal computer, comprising a telecommunication function, on which the image data is loaded from a digital camera.

(Previously Presented) A commercial product sales system comprising a server 18. connected to a predetermined telecommunication network, wherein the server;

receives an electric signal transmitted by way of the telecommunication network as a result of converting image data, into the electric signal, through photographing said image section which prints said desired commercial product that is contained by either of said commercial product-use prints according to claim 6;

receives an order of a specified commercial product by specifying the commercial product in the photographed image section based on commercial product information contained by imaged data by processing the imaged data obtained from the received electric signal;

Serial Number: 10/594,696 Filing Date: September 28, 2006

Title: COMMERICAL PRODUCT SALES SYSTEM, COMMERICAL PRODUCT SALES-USE PRINT FOR SAME AND PRINTING METHOD FOR THE PRINT

transmits image information of a prescribed format to a party transmitting the electric signal by way of the telecommunication network;

confirms that data responded by the transmitting party based on the transmitted image information by the prescribed format is the data correctly corresponding to the prescribed formate: and

carries out the processing of a delivery instruction of the commercial product to the transmitting party and of charging the price of the commercial product based on the confirmed data.

(Previously Presented) The commercial product sales system according to claim 15, 19. wherein

commercial product-use prints according to claim 6 are distributed to unspecified number of consumers or the ones wanting to be distributed.
